Description

The Shake effect causes the target element to move back and forth horizontally three times, simulating the shake of a head.

This effect ignores any setting of the *duration* option.

Syntax

You can use one of the following two forms to use this effect –

```
new Effect.Shake('id_of_element', [options]);
```

OR

```
new Effect.Shake(element, [options]);
```

Effect-Specific Parameters

This effect does not have any other parameter except the [common parameters](#).

Example
