

SCRIPT.ACULO.US - SWITCHOFF EFFECT

http://www.tutorialspoint.com/script.aculo.us/scriptaculous_switchoff_effect.htm

Copyright © tutorialspoint.com

Description

The SwitchOff effect resizes the target element vertically from the top and bottom towards its center line, and then removes it from the document layout.

A bit of opacity flickering is added to help mimic its real-world inspiration.

Syntax

You can use one of the following two forms to use this effect –

```
new Effect.SwitchOff('id_of_element', [options]);
```

OR

```
new Effect.SwitchOff(element, [options]);
```

Effect-Specific Parameters

This effect does not have any other parameter except the [common parameters](#).

Example

```
<html>
  <head>
    <title>script.aculo.us examples</title>

    <script type="text/javascript" src="/javascript/prototype.js"></script>
    <script type="text/javascript" src="/javascript/scriptaculous.js?load=effects"
  ></script>

    <script type="text/javascript">

      function SWEffect(element){
        new Effect.SwitchOff(element, {duration:3});
      }

      function ShowImage(element){
        new Effect.Appear(element,{duration:1, from:1, to:1.0});
      }
    </script>

  </head>
  <body>

    <div onclick="ShowImage('myimage')">
      Click me to display the image
    </div>
    <br />

    <div >
      
      <h2>Click me to Switch me off!</h2>
    </div>

  </body>
</html>
```

This will produce following result –
