In May 2008, Facebook engineers announced **Facebook connect**, a cross-site initiative that allows users to publish on third-party sites in their Facebook newsfeed. The site was redesigned in late 2008, intended to streamline the website and make it easier to see what friends were doing.

Facebook Groups

Facebook Groups are the places for small group communication where users can share their common interests and express their opinion. Groups allow people to come together around a common cause. Groups are for discussing issues and share related content. Groups range widely – from light-hearted themes to organizing activities to serious topics such as politics and world events.

Facebook Community

A Facebook Community is about an organization, a celebrity, or a topic. Community pages are meant for general topics and all kinds of unofficial but interesting things. These pages let us stay connected with others who share similar interests and experiences.

Adverts on Facebook are unique. They are shown to specific groups of highly engaged people. If your adverts have a great creative content and are well targeted, they get more likes, comments, and shares. When we boost our page posts or expand the audience for the adverts, more people will see them when they visit Facebook. Facebook ads allow us to promote our business, get more fans to our business page, and drive more leads for our sales team. Facebook ads allow us to advertise a website or content that we manage on Facebook *likeagroup, page, orevent*

To create an ad, go to – [Facebook](#) And click "create an ad".

How to Create a Campaign?

With targeted ads, stories, and wall posts, a successful campaign can be a powerful tool in our advertising arsenal. When running a Facebook campaign, we can draw on several Facebook components such as wall posts, Facebook ads, sponsored marketing, unique page tabs, etc. We can break down reports by campaign and also easily start/stop all ad sets within that campaign.

Campaigns correspond to each of our advertising objectives, like building brand awareness or driving web traffic. They are designed to help optimize and measure our results for each objective across multiple ad sites and ads. Each campaign can feature multiple ad sets, each of which has its own budget and schedule. We can also organize each ad set to represent a particular audience segment, for example, we can have an ad set for people who live near our store. This will help us control the amount we spend on each audience, decide when they will see our ads, and measure their response. Within each ad set, we can have multiple ads, each of which can feature a different set of images, links, videos, or text.
