

What is Globalization Testing?

A product is said to be Globalized when that particular product can be run independent of its geographical and cultural environment. This type of testing technique validates whether the application can be used all over the world that accepts all the language texts.

What needs to be Tested ?

- Sensitivity to the language vocabulary
- Date and time formatting
- Currency handling
- Paper sizes for printing
- Address and telephone number formatting
- Zip Code Format

Advantages of Globalization Testing

- It reduces overall testing and support costs
- It helps us to reduce time for testing which result faster time-to-market
- It is more flexible and product is easily scalable
