## What is Manual Testing?

Manual testing is a testing process that is carried out manually in order to find defects without the usage of tools or automation scripting.

A test plan document is prepared that acts as a guide to the testing process in order to have the complete test coverage.

## What is Manual Testing?

Following are the testing techniques that are performed manually during the test life cycle:

- Acceptance Testing
- · White Box Testing
- Black Box Testing
- Unit Testing
- System Testing
- Integration Testing
