TEST COMPLETION MATRIX

What is Test Completion Matrix?

Upon completion of testing, various matrices are collected to prepare the test reports. Below are some of the criteria for preparing the reports:

- No. of Tests Executed

- No. of Tests Passed

- No. of Tests Failed

- No. of Test Failed based on each module

- No. of Test Defects Raised during the execution cycle

- No. of Test Defects Accepted

- No. of Test Defects Rejected

- No. of Test Defects Deferred

- Status of Active defects

- Calculating Quality Index of the Build
