UDDI API - GET_PUBLISHERASSERTIONS

Description : The get_publisherAssertions API call is used to obtain the full set of publisher assertions that is associated with an individual publisher account.

This API call returns a publisherAssertions message that contains a publisherAssertion element for each publisher assertion registered by the publisher account associated with the authentication information. Only assertions made by the individual publisher are returned.

Version 2.0 Syntax

```
<get_publisherAssertions generic="2.0" xmlns="urn:uddi-org:api_v2" >
    <authInfo/>
</get_publisherAssertions>
```

Arguments

authInfo : This required argument is an element that contains an authentication token. Authentication tokens are obtained using the get_authToken API call.

Error Returned

If any error occurs in processing this API call, a dispositionReport element is returned to the caller within a SOAP Fault. The following error number information will be relevant:

E_authTokenExpired : It signifies that the authentication token value passed in the authInfo argument is no longer valid because the token has expired.

E_authTokenRequired : It signifies that the authentication token value passed in the authInfo argument is either missing or is not valid.
