# VBA - CONSTANTS

An If statement consists of a boolean expression followed by one or more statements. If the condition is said to be True, the statements under If condition$_s$ are Executed. If the Condition is said to be False, the statements after the If loop are executed.

Syntax :

The syntax of an **If** statement in VBScript is:

```
If(boolean_expression) Then
    Statement 1
 .....
 .....
    Statement n
End If
```

Flow Diagram

Example

For Demo purpose, we will find the biggest between two numbers of an Excel with the help of a function.

```
Private Sub if_demo_Click()
    Dim x As Integer
    Dim y As Integer

    x = 234
    y = 32

    If x > y Then
        MsgBox "X is Greater than Y"
    End If
End Sub
```

When the above code is executed, it produces the following result:

X is Greater than Y
