LTrim

The Ltrim Function removes the blank spaces that are there on the left side of the string.

Syntax

```
LTrim(String)
```

Example

```
<!DOCTYPE html>
<html>
<body>
<script language="vbscript" type="text/vbscript">

var =          "          Microsoft VBScript"
document.write("After Ltrim : " & LTrim(var) & "<br />")

</script>
</body>
</html>
```

When you save it as .html and execute it in Internet Explorer, then the above script will produce the following result:

```
After Ltrim : Microsoft VBScript
```
