## Mid

The Mid Function returns a specified number of characters from a given input string.

## Syntax

```
Mid(String, start[, Length])
```

- String, a Required Parameter. Input String from which the specified number of characters to be returned.
- Start, a Required Parameter. An Integer, which Specifies starting position of the string .
- Length, an Optional Parameter. An Integer, which specifies the number of characters to be returned.

## Example

```
<!DOCTYPE html>
<html>
<body>
<script language="vbscript" type="text/vbscript">

var="Microsoft VBScript"
document.write("Line 1 : " & Mid(var,2) & "<br />")
document.write("Line 2 : " & Mid(var,2,5) & "<br />")
document.write("Line 3 : " & Mid(var,5,7) & "<br />")

</script>
</body>
</html>
```

When you save it as .html and execute it in Internet Explorer, then the above script will produce the following result:

```
Line 1 : icrosoft VBScript
Line 2 : icros
Line 3 : osoft V
```
