Trim

The Trim Function removes both the Leading and Trailing blank spaces of the given input string.

Syntax

```
Trim(String)
```

Example

```
<!DOCTYPE html>
<html>
<body>
<script language="vbscript" type="text/vbscript">

var =          "          Microsoft VBScript          "
document.write("After Trim : " & Trim(var) & "<br />")

</script>
</body>
</html>
```

When you save it as .html and execute it in Internet Explorer, then the above script will produce the following result:

```
After trim : Microsoft VBScript
```
