# WEB SERVICES - SUMMARY

In this tutorial you have learned what are web services and how to use them. But there other components of Web Services which makes Webservices active. These components are :

The next step is to learn about WSDL, UDDI and SOAP.

**WSDL**

WSDL is an XML-based language for describing Web services and how to access them.

WSDL describes a web service, along with the message format and protocol details for the web service.

To learn more about WSDL visit WSDL Tutorial

**UDDI**

UDDI is an XML-based standard for describing, publishing, and finding Web services.

To learn more about UDDI visit UDDI Tutorial

**SOAP**

SOAP is a simple XML-based protocol that allows applications to exchange information over HTTP.
