WML does not support element, but there are other WML elements, which you can use to create different font effects like underlined text, bold text and italic text, etc.

These tags are given in the following table:

WML Elements	Purpose

<big>	Defines big text
	Defines emphasized text
<i>	Defines italic text
<small>	Defines small text

These elements support the following attributes:

class	class data	Sets a class name for the element.

Following is the example showing usage of these elements.
